

The logo for VAN TOURER features the word "VAN" in a grey, sans-serif font, followed by a stylized orange and grey "T" symbol, and then the word "OURER" in the same grey font. The background of the entire advertisement is a scenic landscape with a white van parked on a rocky shore next to a small wooden building, with mountains and a blue sky in the background.

GOOD JUST KEEPS

GETTING BETTER!

THE NEW VANTOURER 2024 IS HERE.

Where listening and skill meet, a van is created that not only surprises, but convinces. A van with an innovative bathroom concept that adapts flexibly to your needs. A van with a modern pop-up roof that offers breathtaking views and supports the aerodynamics of the entire vehicle. A van with an optional fold-down bed in all four layouts and an innovative storage space concept in series.

The result is not just a van, but a VANTourer. Whether for holidays or everyday life, beach or city – the new VANTourer is universally applicable. All four layouts offer maximum comfort and practical compactness for every taste. Perfectly complementable useful options. The new, modern interior look with white décor and Malaga Smoke appliqué exudes a modern loft aesthetic that conveys a feeling of home.

The new VANTourer 2024 is based on the FIAT Ducato 9. A modern, automotive exterior paired with many technological innovations ensures incomparable comfort and driving dynamics. Numerous driver assistance systems noticeably increase driving safety, while the engines with up to 180 PS and the latest EURO 6D final emissions standard promise maximum performance and efficiency.

Don't just drive, drive better – welcome to the new VANTourer 2024.

VANTOURER 540 D

- + short, manoeuvrable, an everyday hero and holiday companion
- + transverse bed in a length of 5.41 m
- + energy efficient compressor refrigerator (75 l)
- + Truma diesel central heating

VANTOURER 600 D

- + the classic family layout
- + comfortable and redefined for modern life
- + transverse bed in a length of 5.99 m
- + energy efficient eye-level compressor refrigerator (95 l)
- + Truma diesel central heating

VANTOURER 600 L

- + with two comfortable single beds for the sporty couple
- + single beds in a length of 5.99 m
- + energy efficient compressor refrigerator (75 l)
- + Truma diesel central heating

VANTOURER 630 L

- + the Liner VANTourer with lots of living and storage space
- + single beds in a vehicle length of 6.36 m
- + energy efficient eye-level compressor refrigerator (95 l)
- + Truma diesel central heating

UP TO 40 %

MORE REAR STORAGE SPACE

Was everything better in the good old days? Not at all! The gas cylinder and water tank used to take up so much space that it was nigh-on impossible to take anything bulky with you.

The large lateral rear storage boxes used to jut far out into the loading area, meaning there was little space available for loading. What a waste of space!

The VANTourer has the solution: the fresh water tank can now be found underneath the vehicle. Thanks to the compact TRUMA central heating system, you now only need to take a 3 kg (instead of 11 kg) gas cylinder with you, which is only used for cooking.

With the new, expanded design concept, the storage boxes are significantly narrower and, depending on the layout, the rear loading area is up to 40 % bigger. Even bicycles can fit in the VANTourer diagonally.

UNDERFLOOR FRESH WATER TANK

Yes, you read that right: the fresh water tank is now situated under the vehicle. Not only does this save space, it also gives the already very manoeuvrable VANTourer an extra helping of stability when driving.

The 100 litre fresh water tank is insulated and protected against environmental influences with a special coating.

The fresh water tank is insulated.

Low centre of gravity for more stability when driving.

THE HEATING SYSTEM

THAT CREATES STORAGE SPACE

A real storage saver and foot warmer – in addition to the larger storage space, the TRUMA central heating system offers another advantage – independence.

No need to worry about getting your hands on a new gas cylinder, no installing unwieldy 11 kg giants. Drive with the knowledge that you can top up your TRUMA diesel heating at any filling station at any time of the day or night. In addition, the very quiet heating system is situated centrally where the heat is needed, under the dining area in the living space. Warm air vents in the living, sleeping and rear areas deliver the heat to exactly where it is needed.

DIESEL HEATING 2.0

The boost function warms up the heating even faster on cold days. Thanks to the reduced voltage supply of the fuel pump, the finer switching of the burner stages and the resulting reduction in the speed of the combustion air fan, night operation is pleasantly quiet and leads to less coking.

The temperature dependent pre-glow, the current optimised diesel pump and the elimination of the exhaust fan now ensure greater battery availability.

HOT AIR CIRCULATION

Due to the additional air vent behind the driver's seat, the cab is optimally heated, not just while driving.

BEST INSULATION

Enjoy optimal temperatures when on the road: Cold bridge optimized insulation guarantees superior climate control wherever you are. The particular strengths of the breathable, fabric-covered side panels and the materials used in the ceiling and the floor area lie in their impressive insulation and water absorption properties. Everything remains dry – in contrast to many competing vehicles, in which the side panels are made of plastic.

REAR STORAGE CONCEPT

Van experts know that bikes are stored on the bike rack, but if it rains when you're driving, mud splashes up and without a protective cover the bike is completely filthy, with the subsequent first rays of sun, setting off on a bike ride is difficult and fixing the bikes to the rack on the rear door is annoying. Then there's the thought of bicycle thieves, which can bring restless nights when the bike has to be kept outside. With the VANTourer, you can get one over on both the weather and the thieves and store up to two bikes in the vehicle, depending on the model and layout.

Even in everyday life, the large rear storage space offers plenty of room for moving boxes or other bulky everyday objects – truly a genuine allrounder.

Those familiar with VANTourers will have noticed: On the left is the optional variant with a separate fold-down bed – but what about the layouts with fixed beds?

Only one handgrip is needed to fold up one of the three bed sections – so there is also room for a bicycle in the rear. You will find further conversion options on the following pages – for example, how you can turn the bed into a comfortable couch.

All models have the option of a fold-down bed in the rear, which replaces the standard fixed bed. There is also the option of an extra bed underneath the fold-down bed. So you can not only sleep comfortably, but also convert comfortably.

You can find more technical specifications and videos at www.vantourer.com

THE NEW VANTOURER

TRAVEL MORE RELAXED FOR A BETTER HOLIDAY.

MOBILE COMFORT

Step inside and be inspired by the bright, friendly ambience and the new décor in white paired with Malaga Smoke appliques. You will be amazed at the generously dimensioned interior – despite the compact exterior dimensions.

Take a seat and make yourself comfortable, whether you're on the front seats, which can be quickly turned round for a cosy get-together, or the comfortable bench – both are fitted with a high quality fabric/artificial leather combination that is not only chic but also easy to clean. The table adapts smart to your wishes – folded in, you can easily reach from the cockpit to the rear – swung out, the table offers a comfortable size. The table is the same size in all layouts.

1 These seats are very comfortable. Enjoy automotive comfort with fleece reinforced upholstery in the pilot seats as well as on the bench seat. With its high quality feel, the upholstery underlines the inviting atmosphere of the VANTourer. The dinette bench seat can be easily extended without the need for complex conversion of the head restraints, thus providing even more seating space – even a child seat can be easily attached. The headrests are adjustable in height. Optionally, 2 sliding single seats are also possible.

600 D

Let in more light. The new optional bow conversion with a large panorama window provides a particularly light flooded living space. The window can be opened outwards for an optimal indoor climate. A folding shelf is positioned in front of it. It is ideal for storing jackets and other light items of clothing. On the sides next to the shelf you will find further practical storage space.

1 2 Comfort included – the panorama window adapts to your individual needs with its integrated blackout or insect screen function.

3 Practical: when the shelf is not in use, it can simply be folded up.

1

High quality and innovative: This is not the only initial impression you get when you step into the VANTourer. Nowhere do you see screwed joints – this is high quality furniture construction. Unprotected sharp edges? No way! Also, where the furniture has been glued, neither formaldehyde or any other noxious substance has been used. But stable and durable woods. Experience it for yourself – everything here is a well rounded package.

1 The curved lines of the wall units not only look good, but also enclose more storage space than with conventional motor homes.

2 Perfectly placed – you can place your TV in the TV compartment on the bathroom wall without any tangled cables. So you always have everything in view.

2

3

3 The dimmable, energy efficient LED ambient lighting below the wall units creates a particularly cosy atmosphere in the living area. Just the right light to help you relax at the end of the day.

4 Details make all the difference. The high quality upholstery in a bicolour look convinces with its feel. The additional fleece layer improves comfort when sitting, even on longer journeys – perfectly balanced, not too hard, not too soft.

5 The first impression counts: A kitchen back wall simply cannot look any better.

4

600 D

600 D

COOKING WORLDS TO ENJOY FOOD

Your shopping basket full of local delicacies. Fresh from the market, you enter the kitchen and your cooking enjoyment begins. Whether you're an amateur or a gourmet chef – here, functionality makes cooking a joy. In the VANTourer, you'll find everything you need in the right place to prepare meals on your trip.

There's plenty of kitchen storage space: The raised 95 litre refrigerator in the 600 D and 630 L stores holiday delicacies. The space saving version with 75 litres in the 540 D and 600 L leaves more room for preparation. The kitchen drawers with stable, roller mounted full extension runners and soft close as well as the wall units with height adjustable shelves keep all the utensils from plate to pot ready for you. Drawer and door edges are covered with thick, durable plastic. The area between the worktop and kitchen wall is sealed, so no splashes get behind the wall cladding. Here too, quality is important.

1 The sink cover is also a chopping board, so everything can be generously prepared in a small space and then cooked safely and quickly on the 2 flame gas cooker including Piezo igniter

2 The backlit and plexiglass storage compartment offers space for spices and gives the kitchen a modern look.

3 Quiet and economical, the compressor refrigerator runs at only 12V to keep your food fresh.

600 D/630 L

SLEEPING SPACE FOR SWEET DREAMS

The bedroom offers maximum comfort, not only for sleeping, but also for reading, dreaming and relaxing. The breathable fabric wall covering prevents annoying condensation. The slanted and deep drawn wall units provide headroom and offer plenty of space.

- 1 Atmospheric:** The dimmable LED light strip can be individually adjusted to your needs.
- 2 Practical:** the flat LED reading lights with integrated USB charging sockets are placed under the wall units.
- 3 Everything has been thought of:** In the rear, below the speakers, there is also a protected 230 V socket and a USB charging socket.

What's wrong with just spending the day in bed? Nothing really – it's a holiday, after all. And here in the bedroom it's even cosier than at home. Not least thanks to the wonderful view. Make yourself comfortable and let your thoughts wander into the distance, because the window front offers a panoramic view of the outdoors.

Or pick up a good book and relax while reading. Power saving LED light strips with USB connection provide a pleasant atmosphere.

Flexibility is the keyword – because who wants to just stick to living and sleeping when the living area is so wonderfully flexible? With a few simple steps, you can turn your bed into a comfortable couch and watch a good film, or open the rear doors wide and enjoy your surroundings.

1 In the spacious sleeping area it is also possible to spend the night comfortably for two. The even more comfortable EvoPoreHRC® mattresses with innovative WATERGEL® overlay are available as an option.

2 Raise the headboard and cast your eye over your VANTourer.

3 Fold the footrest back and enjoy the view through the VANTourer's open doors.

THE VARIO BATHROOM ...

The VANTourer 2024 impresses with the vario bathroom, which is integrated as standard in all four models. Why should you decide when you can have everything?

The flexible combination of compact separate bathroom and en-suite bathroom leaves you free to choose – space saving bathroom with washbasin or simply converted, an en-suite bathroom with lots of space for the great showering pleasure.

...WE KNOW EVERY TRICK IN THE BOOK

1 In "standard" mode you can easily walk back and forth between rear and cockpit and **2** use the toilet and the larger basin as in the usual compact bathroom. An insert in the additional shower tray improves the look and feeling. The edges are now flattened for more sure footedness.

3 The shower tray insert is removed with a simple hand movement, **4** the angled shower wall is swung forward and **5** a shower curtain is pulled around – everything is ready for your showering pleasure in the bathroom. The new shower curtain can also be used as a room divider between the living and sleeping areas.

6 The bathroom door locks magnetically on the opposite fastening edge.

7 Once you have removed the shower tray insert, the extended shower tray offers plenty of space for extensive showering experience.

8 You can stow the shower tray insert in a perfectly fitting compartment under the bed with a single handle.

In the vario bathroom there is not only more space for your relaxing shower, the washbasin has also increased in size considerably. The shower curtain features a fabric covered with high tech material that makes water roll off even easier. The fibreglass rods keep it in top shape at all times. The toilet window allows steam to escape quickly and, in conjunction with the pull out tap, also allows a refreshing outdoor shower.

VANTOURER 2024

PLENTY OF SPACE AT THE REAR

It's always like that – you want to be prepared for everything in your holiday. For that reason it's important that your storage space is as flexible as possible.

The VANTourer offers – in comparison with many competitors – a flexible bed that can easily be folded upwards at two ends, creating lots of free space.

- 1 Always safe on the road** – a modern dog crate finds a secure place under the lying surface of the lift bed.
- 2 Do you need more storage?** No problem. Just fold the foot- or headrest upwards and use the resulting space however you need.
- 3 Smart!** Thanks to the latching hinge at the foot end, you can fold the bed up and latch it in place.

VANTOURER 2024

OPTION: THE ALLROUNDER WITH FOLD-DOWN BED

Do you need a bit more space? In the rear of the VANTourer there's not only space – but freedom. All four layouts can be optionally equipped with an infinitely adjustable fold-down bed.

While traditional fold-down beds that you see in significantly more expensive motorhomes, disappear completely under the ceiling and cannot then be used for sleeping, the sleeping area in a VANTourer is fully usable (depending on the position), while valuable holiday essentials, e.g. your expensive bike, can be safely and cleanly stowed away, giving customers peace of mind.

- 1 Travelling as a party of four?** No problem. Simply lift the fold-down bed to its highest position and you instantly create space for a double bed underneath (option).
- 2 Still space left** – even when lowered to the middle position.
- 3 When in the bottom position,** it's as comfortable to sleep in as your own bed at home.

VANTOURER FOR 4

OPTION: THE INNOVATIVE POP-UP ROOF

Sleep like kings – thanks to the pop-up roof this is now your routine. With it, two more people will find a cozy sleeping place with a special view.

The innovative pop-up roof, manufactured using LFI technology, offers optimum insulation values compared to conventional GRP constructions, and maximum stability, as the entire roof is manufactured as a complete part. During development, great importance was also attached to a particularly aerodynamic shape of the pop-up roof in order to guarantee optimum driving characteristics. The lines of the frame were harmoniously extended into the rear area.

THE VANTOURER ROOF PACKAGE (OPTION):

- pop-up roof (white or lava grey) in LFI technology, incl. mosquito net and blackout
- aerodynamic lines for optimised driving behaviour
- ladder for easy ascent
- comfort bed with reading lights
- roof hatch incl. flyscreen and blackout
- LED lighting in the entire pop-up roof
- practical storage compartments with USB charging socket and bottle holder
- warm air outlet in the pop-up roof
- huge lying surface (200 x 130 cm)

Simply put up the lightweight aluminium ladder and fold up the pop-up roof – your comfortable second bedroom is ready. With a generous height and lying surface, the sleeping area offers everything for a restful sleep.

Two windows, reading lights and the LED light strip always put your relaxing hours in the right light. A warm air outlet ensures air circulation even when the side walls are closed.

For breathtaking moments under the stars, you can partially remove the outer canvas, blackout and mosquito net.

The generously dimensioned ceiling opening makes access to the spacious sleeping area easy as pie.

Next to the roof hatch, there are practical shelves on both sides, including cup holder and

USB socket. On request also with inductive charging tray.

The ladder is installed in just a few steps.
